

We offer a "New Method" of recovery for addictive individuals and their families who feel that their life situation is hopeless.

Our positive-growth program teaches clients how to live free of addiction and associated behaviors.

We have personal experience dealing with the hardships of addiction as well as the benefits of recovery. We have developed a program that is unparalleled in addiction medicine.

Our "New Method" empowers the client and offers a new chance at life - providing a strong foundation so clients learn not just to survive, but to live again!

compassion

treatment

We provide a truly unique approach to the recovery experience. In a typical week our clients enjoy body work, acupuncture, guided imagery, life skills training, individual/group and family counseling, equine therapy, exercise, nutritional classes, art therapy and more.

We incorporate evidence-based therapy, medical treatment, holistic modalities and 12 step philosophy to bring about positive results.

Our location in beautiful Orange County, California provides opportunities for fun as well as therapeutic activities. The beaches, a strong 12 step community, job opportunities, schools and shopping are all here for you.

We are here to support, encourage, and assist you, as you build a new life.

commitment

our staff

Our treatment team has decades of combined experience in the field of addiction recovery. By practicing our own healthy recovery skills, we act as role models and represent hope that you can come through to the other side of addiction.

We have the best in our field to help us make the dream of such an amazing treatment center become a reality. While all of our staff members are trained professionals, first and foremost we are compassionate, whole human beings looking to give what we can to help each and every individual that walks through our doors.

trust

We can accommodate you in our intensive outpatient program while you live at home, or you may stay in one of our beautiful sober living facilities for men or women. The idea of choosing your living environment during the addiction recovery process is new and fresh. We believe that recovery can work anywhere as long as you are willing to actively participate in your treatment process.

balance

flexible accommodations

"the program recognizes the connection of mind, body, and spirit, treating the full spectrum of addiction - not just addictive behaviors ..."

understanding

Something different - Not your usual treatment

We are not like other treatment centers - one reason is that no one offers our diversity of treatment approaches integrated into a single program.

Another reason is the level of compassionate care our clients find here. We always seek to uplift instead of impugn. Our talented team of professionals can relate to our clients with care and understanding because much of our team have years of recovery themselves.

innovation

We've created a program that teaches tangible methods to achieve wellness of mind, body, and spirit. Through wellness come the coping skills required for living a successful life.

Our program is designed to take the client from early recovery to experiencing a fulfilling life in the real world. They begin using the tools of recovery at work, school, volunteering, and coping in real life situations with our team as the safety net.
